

Modify Order (TRADE)

API Description

Order modify function, currently only LIMIT order modification is supported, modified orders will be reordered in the match queue

Method

`order.modify`

Request

```
{
  "id": "c8c271ba-de70-479e-870c-e64951c753d9",
  "method": "order.modify",
  "params": {
    "apiKey": "HM0chcfiT9ZRZnhjp2XjGXhsOBd6msAhKz9joQaWwZ7arcJTlD2hGPHQj1lGdTjR",
    "orderId": 328971409,
    "origType": "LIMIT",
    "positionSide": "SHORT",
    "price": "43769.1",
    "priceMatch": "NONE",
    "quantity": "0.11",
    "side": "SELL",
    "symbol": "BTCUSDT",
    "timestamp": 1703426755754,
    "signature": "d30c9f0736a307f5a9988d4a40b688662d18324b17367d51421da5484e835923"
  }
}
```

Request Weight

1 on 10s order rate limit(X-MBX-ORDER-COUNT-10S); 1 on 1min order rate limit(X-MBX-ORDER-COUNT-1M); 1 on IP rate limit(x-mbx-used-weight-1m)

Request Parameters

Name	Type	Mandatory	Description
orderId	LONG	NO	
origClientId	STRING	NO	
symbol	STRING	YES	
side	ENUM	YES	<code>SELL</code> , <code>BUY</code>
quantity	DECIMAL	YES	Order quantity, cannot be sent with <code>closePosition=true</code>
price	DECIMAL	YES	
priceMatch	ENUM	NO	only available for <code>LIMIT</code> / <code>STOP</code> / <code>TAKE_PROFIT</code> order; can be set to <code>OPPONENT</code> / <code>OPPONENT_5</code> / <code>OPPONENT_10</code> / <code>OPPONENT_20</code> : / <code>QUEUE</code> / <code>QUEUE_5</code> / <code>QUEUE_10</code> / <code>QUEUE_20</code> ; Can't be passed together with <code>price</code>
recvWindow	LONG	NO	
timestamp	LONG	YES	

- Either `orderId` or `origClientId` must be sent, and the `orderId` will prevail if both are sent.
- Both `quantity` and `price` must be sent, which is different from dapi modify order endpoint.
- When the new `quantity` or `price` doesn't satisfy `PRICE_FILTER` / `PERCENT_FILTER` / `LOT_SIZE`, amendment will be rejected and the order will stay as it is.
- However the order will be cancelled by the amendment in the following situations:
 - when the order is in partially filled status and the new `quantity` \leq `executedQty`
 - When the order is `GTX` and the new price will cause it to be executed immediately
- One order can only be modified for less than 10000 times

Response Example

```
{
  "id": "c8c271ba-de70-479e-870c-e64951c753d9",
  "status": 200,
  "result": {
